

Join OpenStreetMap today!

The international project start page and map portal can be found at www.openstreetmap.org. There's also a wiki with a wealth of project information and of course mailing lists and Q&A forums.

The first English edition of the book "OpenStreetMap – Using and Enhancing the Free Map of the World" by Frederik Ramm, Jochen Topf, and Steve Chilton was published in 2010 by UIT Cambridge. It explains everything you need to know about contributing to OpenStreetMap, using OpenStreetMap in your applications, and creating your own maps. See www.openstreetmap.info for ordering information.

OpenStreetMap uses the Creative Commons Attribution Share-Alike license. There are no usage restrictions which means you can use OpenStreetMap for whatever purpose you like. Works based on OSM data inherit this license.

The map on this double page shows an OpenStreetMap excerpt for London. Just like the map of Manhattan Island on the flip side and the globe on the front page, it was created with Open Source software. Many Open Source programs have been created specially for OSM.

This flyer has been created by Geofabrik (www.geofabrik.de) and funded by UIT Cambridge (uit.co.uk). UK distribution is handled through the OpenCycleMap shop, at shop.opencyclemap.org. Thanks everyone!
